EHS Design is awarded Washington State Convention Center contract for Interior Finish Upgrades

SEATTLE, (August 15, 2011) – EHS Design is pleased to announce the award and start-of-work for the Washington State Convention Center (WSCC) contract for Master Planning of Interior Finish Upgrades. EHS was awarded the contract in April after a competitive selection process.

The recent opening of The Conference Center, a state-of-the-art meeting facility within the convention center complex, has set a new design standard that WSCC is looking to incorporate throughout the interior and exterior of original facility. These upgrades are important in keeping WSCC competitive with other centers in the western United States and Canada.

“WSCC chose EHS Design to assist us in providing better continuity between our buildings,” said Ed Barnes, WSCC Vice President of Operations. “After interviewing several local design firms, we chose to utilize the expertise that EHS will bring to our project”

EHS is currently working on the conceptual design phase to create a Master Plan that will guide WSCC through a number of interior construction phases. Phase 1 interior upgrades include replacement of carpet and wall treatments throughout the original 343,722 square foot facility. Sixteen restrooms will also be completely renovated.

“We were thrilled to be awarded this contract and understand the importance of this project for WSCC and its ability to bring future events to Seattle, said EHS Principal and Lead Designer, Mia Marshall. “Our team is excited to work with the WSCC staff to create fresh, innovative, and energetic interior spaces that will make WSCC even more beautiful and distinctive.”

The renovations are scheduled to begin in December 2011.
